

Do you have Internet access with your smartphone?

You can download your eKEY software right now!

If you can access the internet with your smartphone, you can download the eKEY applications directly to your smartphone wirelessly.

Important! If you do not have a data plan with your cellular provider, you will be charged additional fees by your cellular provider for downloading data to your smartphone.

To download eKEY Software over-the-air:

First, on your smartphone open an Internet connection and navigate to: www.ekeymobile.com. Then, follow the instructions for your device.

Palm Smartphone Device

Select the link shown to download the eKEY software to your smartphone.

Windows Smartphone Device

Click each of the links shown on the screen to download all of the eKEY applications to your Smartphone.

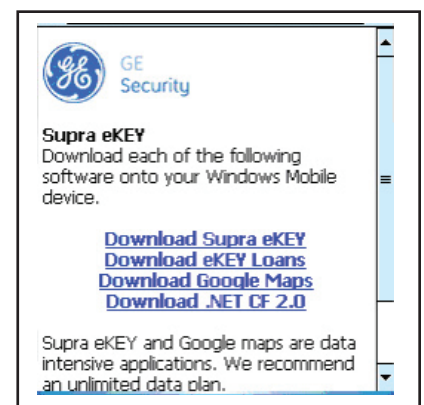

Note: The .NET application does not need to be downloaded if you have Windows Mobile 6.0 or later. If you do not know what version of Windows Mobile your smartphone has, try launching the eKEY applications after downloading the first three links. If the eKEY software launches without an error, you do not need to download the .NET application.

Authorize

After the software has been downloaded, launch the eKEY application. You'll be prompted to enter an authorization code. You can obtain an authorization code from your Association or from a GE representative at an installation event.
